PROFILE

Versatile and enthusiastic back-end developer with over two years of professional experience, complemented by academic foundations in programming. While continuously expanding skills in server management, DevOps practices, and high-level system design. Passionate about learning and taking on the challenges of large-scale application development.

EDUCATION

University of Tehran

B.Sc. - Electrical Engineering

Relevant Courses

- Discrete Mathematics
- Digital Systems
- Advanced Programming
- Computer Architecture

SKILLS

Backend Development

Django (Adv), **RESTful API** (Adv)

Python (Adv), **Node.js** (Inter)

Express (Inter), **FastAPI** (Inter)

PHP (Basic)

Development Tools

Docker (Adv) **PostgreSQL** (Adv)

Git (Adv), **Gitlab** (Inter)

Nginx (Inter), **MongoDB** (Inter)

MySQL (Inter), **Redis** (Basic)

Apache (Basic)

Frontend Development

React (Adv), **Javascript** (Adv)

Next.js (Adv), **HTML & CSS** (Adv)

Typescript (Inter)

OTHER

Certifications

IBM Back-End Development - Coursera

Advanced Python Programming -

Quera College

Languages

Persian (Native)

English (Advanced)

Italian (Basic)

EXPERIENCE

Qbit Group

Oct 2023 - Jan 2025

Full-Stack Developer

- Designed and developed prototypes for +4 projects, creating foundational architectures using **MERN** stack (**MongoDB**, **Express**, **React**, **Node.js**).
- Refined expertise in **Django**, **PostgreSQL**, and **Python** by optimizing queries and APIs, contributing to +20 process-intensive features for projects like **Kooja**.
- Configured and maintained servers across 7 projects, optimized server networks configuring **Nginx** and streamlining pipelines by containerizing server components with **Docker** reducing deployment time by 40%.
- Improved **Smart Parking** project load time and API performance by migrating to **Next.js**, enabling better image rendering and **SSR** (server-side rendering).
- Optimized the performance of the AI detection model for the **Smart Parking** project by improving video frame transmission, streamlining API interactions across 3 servers, and implementing pre-detection algorithms that reduced invalid data by 63%.
- Leveraged **GitLab CI** to automate testing on commits and feature branches, reducing manual effort and saving the team +5 hours weekly.

Library Organization of Iran

July 2023 - Oct 2023

Backend Developer

- Collaborated with a team of developers to build a web application for the Library Organization of Iran.
- Developed +30 tools and features to analyze and display geographical data nationwide, utilizing **Python** and **Django**.
- Utilized data analysis libraries, including **Pandas**, **Numpy**, and spatial libraries like **Leaflet** and **PostGIS**.
- Integrated **GeoServer** APIs for data retrieval and storage, while implementing **GeoFence**.
- Designed and implemented the entire admin panel, developing over 20 components, customizing **Django templates**, and creating forms to streamline data processing.

Maktab Sharif Institution

June 2020 - Sep 2020

Web Developer Intern

- Learned **HTML**, **CSS**, **PHP**, and **Laravel**, developing clean code and professional Programming.
- Gained hands-on experience in Web development and coding best practices.

PROJECTS

Khorshid Sport's Admin Panel

Jan 2025 - present

Designed and implemented a comprehensive admin dashboard using **Django**, enabling full control over website content and internal business operations. Developed custom modules for staff and sales teams including **invoicing**, **CRM**, and **business analytics**, streamlining daily workflows and improving operational visibility saving +10 hours of manual work weekly.
